Student Travel Award - Faculty Recommendation

The STA supports students that have been accepted to meetings or events sponsored by professional organizations for the purpose of reporting the results of research or otherwise disseminating results of their scholarly activity. This award is made with the following expectations on the part of the student:

- The student will be present to defend the poster during the time period the poster is scheduled for presentation.
- The student will attend other poster and oral presentations after discussion with the mentor.
- The student is free to attend other presentations of interest.

Please discuss these and any other expectations you might have with the student prior to the conference. For most of our students, this will be their first attendance at a scientific conference and it is easy to get overwhelmed by all of the activity. Such discussions prior to the conference them focus.
