Learner Travel Award - Faculty Recommendation

The LTA supports learners that have been accepted to meetings or events sponsored by professional organizations for the purpose of reporting the results of research or otherwise disseminating results of their scholarly activity. This award is made with the following expectations on the part of the learner:

- The learner will be present to defend the poster during the time period the poster is scheduled for presentation.
- The learner will attend other poster and oral presentations after discussion with the mentor.
- The learner is free to attend other presentations of interest.

Please discuss these and any other expectations you might have with the learner prior to the conference. For most of our learners, this will be their first attendance at a scientific conference and it is easy to get overwhelmed by all of the activity. Such discussions prior to the conference can help them focus.

Recommender Name:

Recommender Email:

Learner Name:

How is the research project/presentation connected to the mission of the UIWSOM?

What impact does presenting at this conference have on the student's professional development?
