

2. STRATEGY-RESEARCH AND SCHOLARLY ACTIVITY: The goal of the Office of Research and Innovation (ORI) is to foster and support research and scholarly activity that will distinguish the School of Osteopathic Medicine by scholarship, innovation, transformation, and collaborative excellence.

RATIONALE: UIWSOM is committed to preparing socially accountable osteopathic physicians who will work to enhance health equity and address health disparities. This commitment will be reflected through the development of a medical curriculum and related scholarly activity and research agenda founded on principles of social accountability.

METRICS OF EXCELLENCE:

1. Established collaborative, interdisciplinary research partnerships.
2. Established programs to train and mentor faculty and students in research and scholarly activity.
3. Established programs to provide financial support of faculty and student research and scholarly activities and improve research infrastructure.

Key Initiatives	Objectives	Timeline
A. Develop areas of scholarly activity and research consistent with the UIWSOM mission.	a. Develop collaborative research that directly benefits local communities, particularly those that experience health disparities, through faculty and student funding with goal of eventual extramural funding in the following target areas: <ol style="list-style-type: none"> i. Osteopathic (OMM, OPP) ii. Population health and community engagement iii. Progression from basic biomedical to translational research and to clinical trials iv. Medical education 	Ongoing
	b. Develop and expand our current interactions with KBR and Areva	Ongoing
B. Education and training for faculty and students in scholarly activity and research to further the translational educational goals of UIWSOM.	a. Analytical approaches to search databases to support health equity and disparities research.	Ongoing
	b. Construction and analysis of surveys.	Ongoing
	c. Statistical support	Ongoing
	d. Research training to support residents	Ongoing
